Nutriwomen Nutri-Firm Cellulite Cream with Bodyfit (Glaucine).

Function:

Diminishes the appearance of cellulite and enhances skin firmness.

Properties:

Glaucine is a multifunctional Molecule that stimulates lipolysis And inhibits the appearance of new adipocytes, by calcium flow regulation.

Characteristics:

Bodyfit™ visibly reduces the appearance of cellulite, while contributing to an improvement in drainage and water distribution throughout the tissue. As the cellulite diminishes, skin firmness is restored.

Points of interest:

The glaucine enhances reversion of adipose tissue towards a mesenchymatous tissue of fibroblastic character.

Recommended use level:

2.5%

In vivo test: fat deposits, water retention and skin firmness.

Clinical study over 56 days on 17 female volunteers applying twice daily a Cream containing 2.5% Bodyfit™ on one thigh.

Results compared to T0

	mean change	maximum change
Fat deposits	-14.2%*	-35%
Roughness	-17.4%*	-43%
Water released (hypodermis)	+7.5%*	-
Firmness (viscoelastic extension)	+14.8%	+20%

Nutriwomen Nutri-Firm Cellulite Cream with Vexel™ Caffeine and Palmitoylcarnitine.

Function:

Firms and tones up the slack areas (arms, stomach and décolleté) thanks to the synergistic action of two molecules, caffeine and palmitoyl carnitine.

Definition:

Hydroglycolic solution combining caffeine and palmitoyl carnitine.

Properties:

Increases firmness, elasticity and skin tonus of stomach and arms. Presents an immediate smoothing effect on the décolleté.

Characteristics:

The synergistic effect of caffeine and palmitoyl carnitine provokes the destocking of fats and skin firmness.

In vivo tests: firming effect of Vexel™ on slack areas 19 women. Twice daily application of a body lotion containing 3% Vexel™ for 1 month on the arms and stomach. Measurement of firmness by cutometry.

ARMS:

Cutometry at 28 days	Firmness	Elasticity	Tonus
Mean variation	+5.3%	+8.6%	+14.7%
	p<0.05	p<0.01	p<0.01
Maximum variation	+19.7%	+24%	+43.7%
% Volunteers with improvement	75%	85%	85%
